

**DBCP Capacity Building Workshop on Ocean Observations for
Operational Services in the Indian Ocean Region**

National Reports

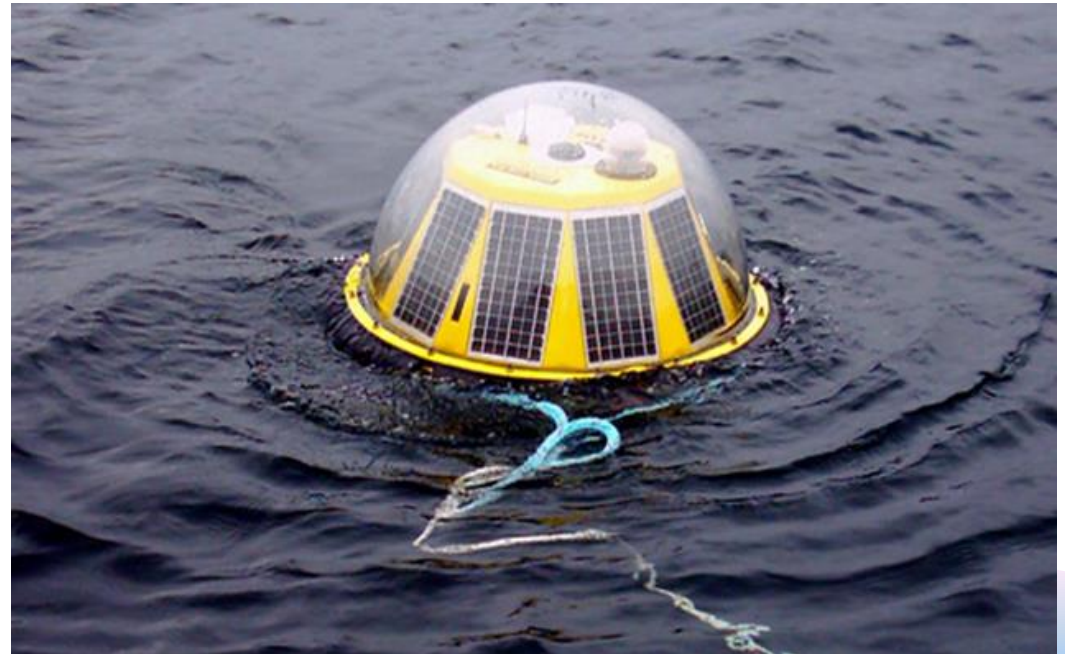

SEYCHELLES

**05 - 07 August 2025
Hyderabad, India**

1. Existing Capacities/Activities for Observation /Forecasting

Seychelles have a wave rider buoy from INCOIS and a buoy model AXYS TRIAXYS from MESA

1. Existing Capacities/Activities for Observation /Forecasting

Tidal gauges is also available

2. Gaps and Needs for Observation /Forecasting

1. Currently the MESA buoy is on land since cost of obtaining data is too high
2. The battery of Wave Ride Buoy is faulty and also have issues with satellite communication
3. Currently the Buoy transmits data between 8am to 3pm when the solar panels are charged, as the sun sets the transmission stops
4. One of the tide gauge has intermittent breaks in Data, so currently offline
