## 29 July 2025 M8.8 Kamchatka earthquake and tsunami: Post-Event Performance Survey

### INTRODUCTION

**An earthquake at a depth of 35km with a magnitude of 8.8 (USGS) on 29 July 2025 23:24 (UTC) offshore Kamchatka, Russia resulted in a TSUNAMI THREAT MESSAGE issued by the Pacific Tsunami Warning Center (PTWC), Tsunami Service Provider (TSP) of the Intergovernmental Coordination Group for the Pacific Tsunami Warning and Mitigation System (ICG/PTWS), 10 min after the event indicating the possibility of hazardous tsunami waves (based on magnitude 8.0 and depth of 74 km) for coasts located in Russia and Japan within 300 km of the earthquake epicenter.**

**The Working Group on Tsunami and other Hazards related to Sea-Level Warning and Mitigation Systems (TOWS-WG) on Tsunami Watch Operations, jointly with the Task Team on Disaster Management and Preparedness recommended that the trigger for implementing a post-event assessment should be a tsunami threat of >1 m amplitude forecast in one or more countries in a region. Over and above this trigger level, the final decision to implement a survey should be decided by the regional Tsunami Information Centre (TIC) in consultation with the ICG Steering Group and the ICG Secretariat taking into consideration whether the tsunami resulted in a national response in one or more countries.**

**From the forecast polygons issued for this event and the sea-level observations as reported in the final message of the PTWC, the trigger threshold was reached. Following consultations with the International Tsunami Information Center (ITIC) and the PTWS Steering Committee it has been agreed that the recent event provides us with an opportunity to evaluate the performance of the system. It will enable Member States of the ICG/PTWS to identify those components which worked properly and, most importantly, any components which did not work in an appropriate manner and are in need of further attention.**

**The post-event assessment questionnaire attached to this letter for reference and use has been designed and approved by the TOWS-WG and subsequently accepted by the IOC Assembly at its 28th session, 18-25 June 2015. Please complete and return the attached questionnaire by email to [laura.kong@noaa.gov](mailto:laura.kong@noaa.gov) copied to [o.necmioglu@unesco.org](mailto:o.necmioglu@unesco.org). Alternatively a Survey Monkey URL has been enabled with the support of the ITIC where you will be able to respond directly all the questions at [https://www.surveymonkey.com/r/peaq\\_kamchatka2025](https://www.surveymonkey.com/r/peaq_kamchatka2025). Our timeline for the**

**assessment is to have all questionnaires returned to us by 5th September 2025.**

**To evaluate the performance of the PTWS and to provide a benchmark of the present status of the system we seek your support and cooperation to complete this questionnaire as fully and accurately as possible. This may involve obtaining inputs from different organisations, but we believe that this effort will have direct benefits for the entire Pacific community at regional, national and local levels.**

**After receiving the questionnaires from the Member States, the information will be compiled and published in a report, which will be distributed to ICG/PTWS members.**

**We would like to stress that the objective of this assessment is to be positive and constructive, and not to be in any way critical or judgemental. We would like the report to be as open and honest as possible, and we hope that you will approach the questionnaire in this spirit. We would also welcome any other information you would like to be included in the report, such as photographs, national reports of the event or any comments on the system and areas in need of improvement.**

**We are confident that all Member States will understand the importance and value of conducting this assessment and we rely on your support. It is vital that we use such events to measure the performance of the PTWS in order to test it and improve it for future tsunami events with even higher destructive potential.**

C.6. If the answer to question C.5. is Yes, what information was provided by the NDMO (or equivalent national response organization) (Tick all the apply):

☐ Tsunami Source information (earthquake origin time, location, magnitude, depth)

☐ Tsunami Wave Information (wave forecast arrival time and/or amplitude), wave observations

☐ Alert level (warning, marine warning, watch, information, etc)

☐ Evacuation guidance or Evacuation areas reports

☐ Safe-to-return or All-Clear guidance or reports

☐ Other (please specify):

C.7. Were any actions taken by the Local or Regional disaster management offices (or equivalent)?

- ☐ Yes
- ☐ No

C.8. If the answer to question C.7. is Yes, what actions were taken? Please list times (UTC) and actions. Include details of organizations or government agencies.

## 29 July 2025 M8.8 Kamchatka earthquake and tsunami: Post-Event Performance Survey

### SECTION D - MONITORING AND MODELLING

D.1. Were sea level data monitored during the event?

- ☐ No
- ☐ Yes, all Pacific Stations
- ☐ Yes, some Pacific Stations

Comment

D.2. How where the stations monitored? (Tick all that apply)

- ☐ GTS using NTWC tools
- ☐ Tide Tool
- ☐ IOC Sea Level Station Monitoring Facility
- ☐ Other Sources or Tools (please specify):

D.3. If the answer to question D.2. is No, does your National Tsunami Warning Centre know how to access sea level data over the GTS, on the IOC Sea Level Station Monitoring Facility, or by Tide Tool?

	Yes	No
GTS	<input type="radio"/>	<input type="radio"/>
IOC Sea Level Facility	<input type="radio"/>	<input type="radio"/>
Tide Tool	<input type="radio"/>	<input type="radio"/>

Comments:

D.4. Did your National Tsunami Warning Centre use any numerical model tsunami scenarios during the event (deep-ocean propagation and/or coastal inundation models)?

☐ Yes

☐ No

If Yes, please describe tools or software, and how they were used:

A large, empty rectangular box with a thin black border, intended for a user to provide details about the tools or software used for tsunami modeling. A small cursor icon is visible in the bottom right corner of the box.

### SECTION E - COMMUNITY PREPAREDNESS

E.1. From 0 (none) to 4 (very high), please rank the scientifically-assessed level of tsunami hazard, the level of community awareness of that hazard, and the level of pre-existing community tsunami preparedness in 5 of the main communities affected by this event.

Please list the names of the communities:

Community 1:	<input type="text"/>
Community 2:	<input type="text"/>
Community 3:	<input type="text"/>
Community 4:	<input type="text"/>
Community 5:	<input type="text"/>

#### E.2. Scientifically-assessed Level of Tsunami Hazard

	0	1	2	3	4
Community 1	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Community 2	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Community 5	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

E.5. Were there any Tsunami Preparedness activities in these Communities, or nationally, prior to the event?

☐ Yes

☐ No

Comments:

E.6. If the answer to question E.5. is Yes, what Preparedness activities were conducted? Please provide dates in Comments (Tick all the apply):

☐ Tsunami Education in school

☐ Participatory evacuation planning

☐ Evacuation map made

☐ Safe Assembly Area or Evacuation facilities identified

☐ Tsunami Exercise

☐ Other (Please specify)

Other (Please specify), Dates of activities, and Comments

E.7. Has there been any government support with regards to the following prior to the event (Tick all the apply)?

- ☐ Tsunami Signage
- ☐ Vertical Evacuation Sites and Procedures
- ☐ Hazard Maps
- ☐ Evacuation Maps
- ☐ Evacuation Route Mapping
- ☐ Other (please specify)

## 29 July 2025 M8.8 Kamchatka earthquake and tsunami: Post-Event Performance Survey

### SECTION F – CAPACITY DEVELOPMENT REQUIREMENTS

**Capacity development is a fundamental component of all IOC UNESCO programmes. To assist us to prioritise and plan our future training activities within our limited resources, please indicate the training needs you consider to be a high priority for your country.**

F.1. What training events or other assistance from IOC would be useful for your NTWC, NDMO, and other response organizations in the next 12 months? (Tick all that apply, and provide your priority)

- ☐ Seismic training
- ☐ Sea Level training
- ☐ Risk Assessment training
- ☐ Standard Operating Procedures training
- ☐ Inundation Modelling training
- ☐ Evacuation Mapping training
- ☐ Community Awareness and Preparedness training
- ☐ Exercises and Drills training
- ☐ Media Awareness training
- ☐ Other support requested (Please specify).  
If multiple supports are ticked, please list your priority order.
