## 1 PURPOSE

To report on the IOTWMS Communications Test conducted on 11 December 2024.

## 2 BACKGROUND

Working Group 2 (WG2) of the Intergovernmental Coordination Group for the Indian Ocean Tsunami Warning and Mitigation System (ICG/IOTWMS), at its meeting in Hyderabad, India on 10-11 February 2011, decided that regular communications tests should be conducted between the Tsunami Service Providers (TSPs) and the National Tsunami Warning Centres (NTWCs) of the IOTWMS.

The objectives of the communications tests are to:

- a. Validate the TSP processes for disseminating tsunami bulletin notification messages to NTWCs.
- b. Validate the reception of the notification messages by NTWCs.
- c. Validate the access by NTWCs to TSP password-protected web sites containing bulletins, threat maps and tables of predicted arrival times and maximum wave amplitudes in real time.
- d. Validate the reporting by NTWCs of national warning status information back to TSPs, via a web-based warning status report form.

Four tests were conducted in 2011, and two tests have been conducted each year between 2012 and 2019. In 2020 and 2023 only one test was conducted as the second test would have occurred in close proximity to Exercise IOWave. This is the report of the twenty-sixth test held on 11 December 2024. The next test is scheduled for 11 June 2025. Below is the test schedule:

Test Number	Date	Status
1	16 March 2011	Conducted
2	15 June 2011	Conducted
3	14 September 2011	Conducted
4	14 December 2011	Conducted
5	13 June 2012	Conducted
6	12 December 2012	Conducted
7	12 June 2013	Conducted
8	11 December 2013	Conducted
9	11 June 2014	Conducted
10	10 December 2014	Conducted
11	10 June 2015	Conducted
12	9 December 2015	Conducted
13	8 June 2016	Conducted
14	14 December 2016	Conducted
15	14 June 2017	Conducted
16	13 December 2017	Conducted
17	13 June 2018	Conducted
18	12 December 2018	Conducted
19	12 June 2019	Conducted
20	11 December 2019	Conducted
21	10 June 2020	Conducted
22	9 June 2021	Conducted
23	8 December 2021	Conducted
24	8 June 2022	Conducted
25	7 December 2022	Conducted

Test Number	Date	Status
26	7 June 2023	Conducted
27	12 June 2024	Conducted
28	11 December 2024	Conducted
29	11 June 2025	Planned

Notes:

- a. In the 2011 tests TSPs issued 12 messages each within a 3-hour period. Since 2012 the TSPs have issued 4 messages each within a 45-minute period.
- b. In addition to the communication tests, six IOTWMS exercises have been conducted since 2011:
  - IOWave11 (12 October 2011)
  - IOWave14 (9-10 September 2014)
  - IOWave16 (7-8 September 2016)
  - IOWave18 (4-5 September 2018)
  - IOWave20 (6-20 October 2020)
  - IOWave23 (4-25 October 2023)

### 3 TEST DETAILS

The details of the procedures used in the 11 December 2024 test are described in the document “IOTWMS Communications Test 11 December 2024 Technical Manual” distributed to NTWCs and TSPs by the ICG/IOTWMS Secretariat on 2 December 2024.

#### Test Earthquake Event Scenario:

Magnitude: 9.2 Mwp  
Depth: 10 km  
Date: 11 December 2024  
Origin Time: 06:00 UTC  
Latitude: 3.30N  
Longitude: 95.96E  
Location: Northern Sumatra, Indonesia

As in previous tests, each participating country was requested to complete a Communications Test Log during the test, recording the time and method of reception of test messages at the NTWC, the NTWC’s ability to access the TSP websites and TSP-Indonesia Warning Receiver System, and the time of the NTWC’s reporting of national warning status information. The Test Log was available for completion online. The Test Logs are the primary source of information for this report and are archived on the Alchemer online survey platform.

### 4 TEST PARTICIPATION

Seventeen (17) IOTWMS Member States participated in the test. This represents the equal lowest rate, well below average number of twenty-one (21) participating Member States across the 28 tests conducted to date. The highest participation rate has been twenty-five (25) countries, and the lowest participation rate has been seventeen (17) countries.

The participants in this test were:

- TSPs - Australia, India, Indonesia

- NTWCs – Australia, Bangladesh, Comoros, France, India, Indonesia, Madagascar, Malaysia, Mauritius, Myanmar, Pakistan, Seychelles, Singapore, South Africa, Sri Lanka, United Arab Emirates and Yemen.

Iran, Kenya, Maldives, Mozambique, Oman, Tanzania, Thailand and Timor Leste did not participate in the test.

Table 1, Chart 1 and Chart 2 show the participation by Member States in all tests conducted so far.

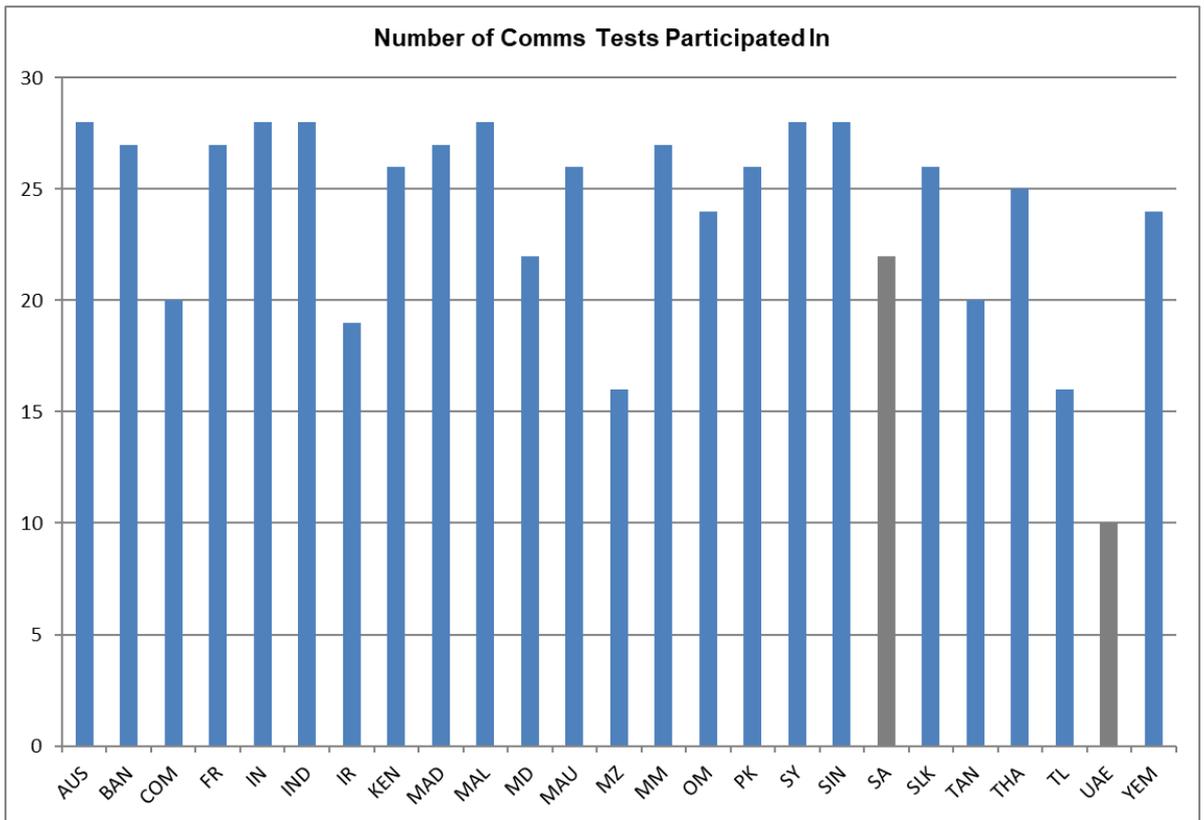

**Table 1: Log of Member State Participation in all Tests**

Test	AUS	BAN	COM	FR	IN	IND	IR	KEN	MAD	MAL	MD	MAU	MZ	MM	OM	PK	SY	SIN	SA	SLK	TAN	THA	TL	UAE	YEM	Total

## 5 MESSAGE DISSEMINATION AND RECEPTION RESULTS

### 5.1 Message Dissemination

**Dissemination Media:** All TSPs issued their test bulletin notification messages via GTS, email, fax, and SMS.

**Issue Times:** See Table 2 for the actual issue times of each TSP bulletin notification message compared to the scheduled issue times.

**Table 2: TSP Test Bulletin Notification Message Issue Times (UTC)**

IOTWMS TSP	Test Start 06:00	Message 1 06:05	Message 2 06:15	Message 3 06:30	Message 4 06:45
Australia	06:00	06:05	06:15	06:30	06:45
India	05:59	06:06	06:18	06:32	06:44
Indonesia	06:00	06:05	06:15	06:30	06:45

**Addresses:** The NTWC fax, email and SMS addresses used by the TSPs were those contained in updates to the IOTWMS NTWC Contact Databases supplied to the TSPs by the ICG/IOTWMS Secretariat on 29 November 2024.

All messages sent by the TSPs are given in Appendix H.

### 5.2 Message Reception

Refer to Appendices A, B, C and D for tables listing the arrival times of the GTS, fax, email, and SMS notification messages received by each NTWC, as reported in their Test Logs. Also refer to Table 3 and Chart 3 for summary figures across all NTWCs.

#### 5.2.1 GTS

The overall highest GTS reception rate was 73% with an average rate of 67% across the three TSPs. This is a decrease from the previous communications test where the GTS average reception rate was 82%.

Thirteen (13) of the 16 GTS-connected NTWCs received GTS messages. Bangladesh, Comoros and Yemen did not receive or report, while Madagascar remains opted out of the service.

GTS messages continue to be received promptly, with most arriving within 1–3 minutes of issuance. The longest delay was 6 minutes for Myanmar to receive the TSP-India notification bulletins 2 and 3.

#### 5.2.2 Fax

The overall highest fax reception rate was 13% with an average rate of 8% across the three TSPs. This is lower than the previous test fax reception rate of 16%.

In this test only four (4) of the 14 NTWCs who opted to receive bulletins via fax reported receiving fax messages, with TSP Australia's messages being received by 0 NTWCs, India's by 2 NTWCs, and Indonesia's by 2 NTWCs.

Fax message delay were mostly less than 1-10 minutes. However, the longest delay was 21 minutes for Myanmar to receive TSP Indonesia notification bulletin 1.

This is the final communications test that will include fax as a delivery method for TSP notification bulletins. As notified in IOC Circular Letter No 3006, the fax transmission

of tsunami information products by Tsunami Service Providers will stop on 31 March 2025.

### **5.2.3 Email**

The overall highest email reception rate was 93%, with an average rate of 87% across the three TSPs. This is slightly lower than the previous test email average reception rate of 89%.

Sixteen (16) out of 17 NTWCs received email notifications. Bangladesh did not receive or report them. Emails from TSP Australia were received by 16 NTWCs, emails from TSP India by 15 NTWCs, and emails from TSP Indonesia by 14 NTWCs.

Email messages continued to be received promptly, with almost all received within 2 minutes of the issue time. The maximum delay was 6 minutes for France to receive the TSP Australia notification bulletin 2 and Australia to receive TSP India notification bulletin 2.

### **5.2.4 SMS**

The highest SMS message reception rates in this test were 36% with an average rate of 35% across the three TSPs. This is slightly lower than the previous SMS average reception rate of 40%.

In this test twelve (12) of the 17 NTWCs received SMS messages. Comoros, France, Mauritius, UAE, and Yemen did not receive or report on the SMS reception from any TSPs.

TSP Australia's SMS messages were received by 7 out of 17 NTWCs, TSP India's messages were received by 7 NTWCs, and TSP Indonesia's messages were received by 6 NTWCs. The longest delay was 27 minutes for Australia and India to receive TSP Indonesia's notification bulletin 1.

## **6 WEB ACCESS AND REPORTING RESULTS**

### **6.1 Web Access**

Refer to Appendix E for a table of web accesses reported by each NTWC.

In this test, the highest overall success rate of web access was 94% with an average rate of 80% across three TSPs. This is marginally lower than previous web access average reporting rate of 81%.

Sixteen (16) of the 17 NTWCs could access at least one TSP website during the test. Comoros did not report access to any of the TSP websites.

### **6.2 Web Reporting**

Refer to Appendix F for a table of NTWC web status reports lodged, as reported by the NTWCs.

In this test, 10 of the 17 NTWCs reported that they lodged web status reports. This rate is 48%, which is less than the previous test (62%).

### **6.3 TSP-Indonesia WRS Access**

Refer to Appendix G for a table of TSP-Indonesia WRS access reported by each NTWC. In this test the TSP-Indonesia WRS access overall success rate was 65%, i.e., 11 out of 17 NTWCs. Australia, Bangladesh, Comoros, Madagascar, Singapore and

UAE did not report. This is the 7<sup>th</sup> time the TSP-Indonesia WRS was used in communications tests.

## **7 RESULTS ASSESSED AGAINST OBJECTIVES**

### **7.1 Validate TSP dissemination processes for tsunami bulletin notification messages**

All three IOTWMS TSPs successfully issued their test messages according to the test timeline through all four specified communications media: GTS, fax, email, and SMS.

### **7.2 Validate reception of notification messages by NTWCs**

Email reception was the most successful communication medium with 87% of the TSP email messages received by NTWCs in this test.

GTS was the second most successful communication medium with 67% of TSP GTS messages being received by NTWCs in this test.

SMS message reception was 35%. It has fallen over the last six tests and is the second lowest rate recorded.

Fax message reception was 8% in this test, which is the lowest rate recorded.

### **7.3 Validate access by NTWCs to TSP password-protected websites**

Website access increased to 80% in this test. It has slightly decreased compared to last test (81%).

### **7.4 Validate reporting by NTWCs of national warning status information**

NTWC status report lodgements reported by NTWCs is 48%. This has decreased compared to last test (62%).

## **8 COMPARISON WITH PREVIOUS TESTS**

The results of this test compared to previous tests are summarised in Table 3 and Charts 3 and 4 below.

Seventeen (17) IOTWMS Member States participated in this 28th IOTWMS Communications Test. This test demonstrated the continuing strength of Email and GTS as the primary TSP delivery mechanism for notifying NTWCs of bulletin updates, followed by SMS and Fax.

Since June 2021, fax reception rates have been below 30% and in this test the reception rate was only 8%. IOC Circular Letter 3006 has notified Member States that the fax transmissions of tsunami information products by the Tsunami Service Providers will stop on 31 March 2025.

This is the seventh communications test in which the TSP Indonesia's WRS was tested. Eleven NTWC's reported accessing the system and three NTWCs provided positive feedback. It is suggested that the WRS could be a viable addition to the delivery channels of GTS, Email, and SMS.

Both TSP webpage access and national warning status reporting rates have declined in this communications test. The webpage access was 80%, and the national warning status reporting was 48%. It is suggested that the submission of online status reports be included in future training activities.

**Table 3: Test Results Comparison**

Test Date:	16-Mar-11 (21 NTWCs)		15-Jun-11 (23 NTWCs)		14-Sep-11 (23 NTWCs)		14-Dec-11 (19 NTWCs)		13-Jun-12 (21 NTWCs)		12-Dec-12 (17 NTWCs)		12-Jun-13 (20 NTWCs)		11-Dec-13 (21 NTWCs)		11-Jun-14 (23 NTWCs)

Notes on Table 3:

4. Percentages are based on the number of NTWCs that:
  - a. Received each TSP's notification messages
  - b. Were able to access TSP web pages
  - c. Were able to lodge NTWC Warning Status Reports via a TSP web page.

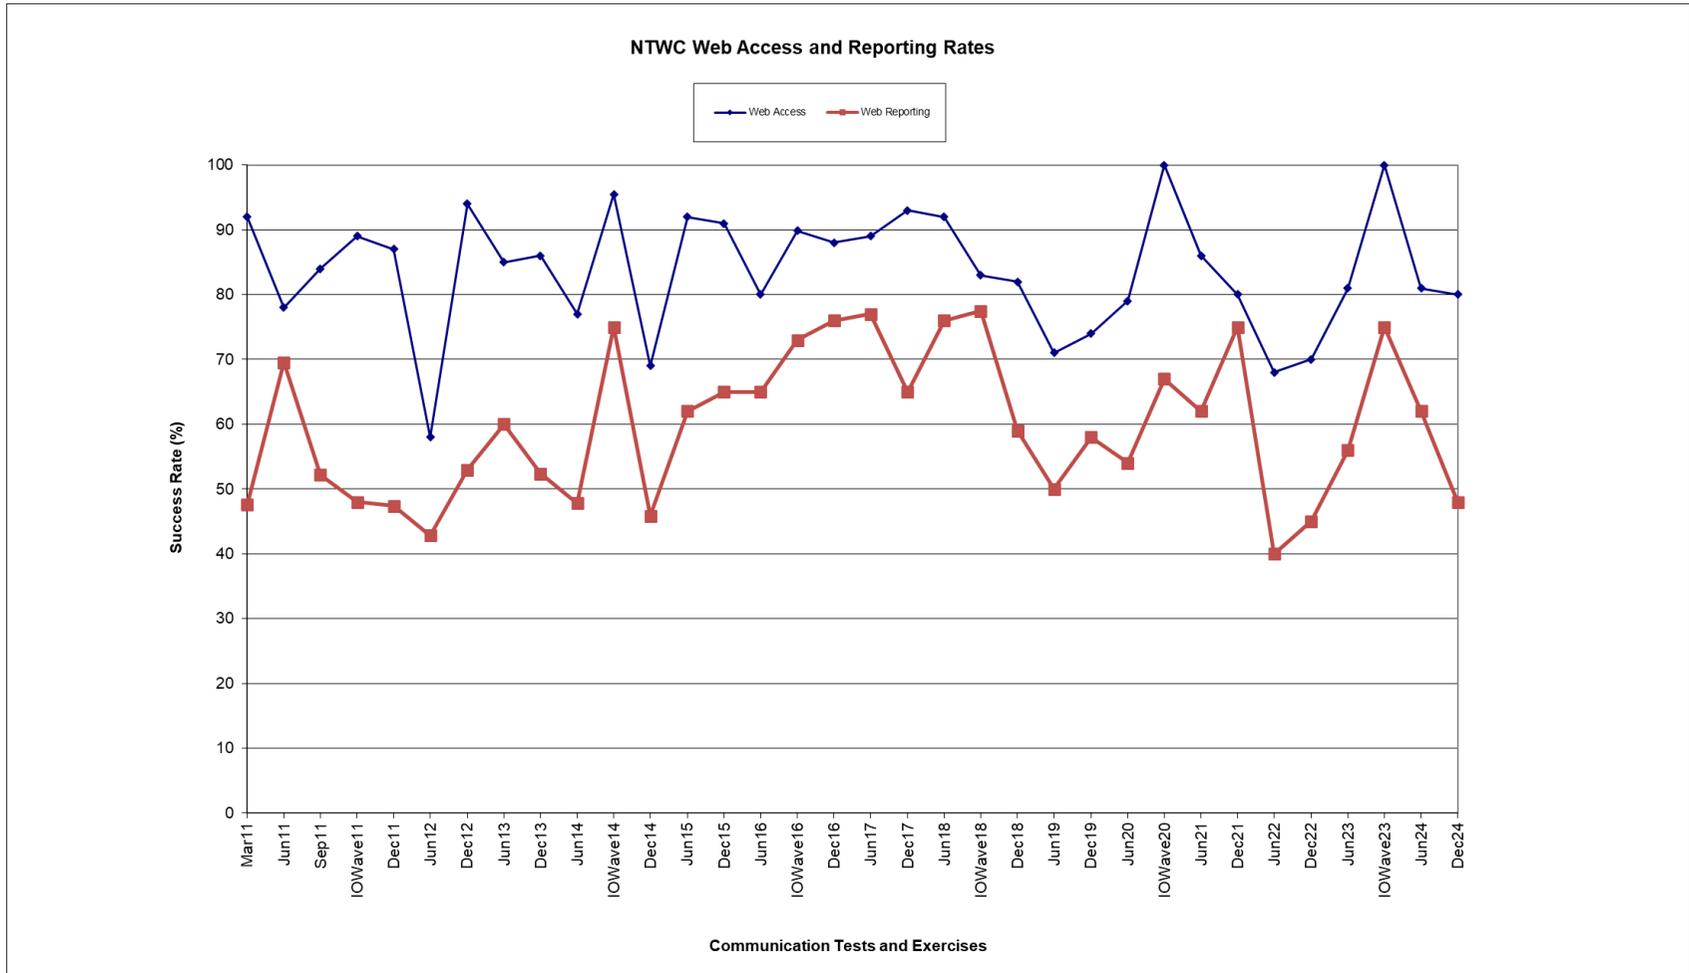

1. Max Delay" is the highest message delay reported across all NTWCs for each TSP's messages.
2. "-"= not issued in test
3. "n/a" = not applicable

**Chart 3: Message Delivery Success Rates**

*The methodology was updated in Dec-22 such that countries that have opted out of a service were excluded from the total when calculating the delivery success rate.*

**Chart 4: Web Access and Status Reporting Success Rates**

## 9 SUMMARY OF ISSUES ARISING

The NTWC receipt of TSP messages by NTWCs, access to TSP websites, and status reporting is summarized in Table 4 below. Follow-up is required to ensure all NTWCs receive TSP messages wherever practical and be able to access the TSP websites. Furthermore, all NTWCs should be encouraged to report their national status during tsunami events and exercises.

- Notes:
- = message not received or not reported
  - n/a = Not applicable. The NTWC in Madagascar are not connected to the GTS.
  - "Tot" = number of NTWCs who received message, out of 16
  - "%" = percentage of NTWCs who received message
  - Message(s) with maximum time delay for each TSP are highlighted in yellow. Highest overall delay = 6 minutes

**Summary of the Current Threat Status as reported by the NTWCs**

This page displays the summary of feedback received from individual NTWCs regarding the Threat Status in their area of responsibility. Within 24 hrs of the current event ending (issue of FINAL bulletin by RTSPs), if no further NTWC feedback is received, this page will be cleared to indicate no warnings.

**Legend**

- Threat Level 0: No impact expected, no flooding, no currents.
- Threat Level 1: There is a potential for tsunami impact, but given the travel time, no response of the public is necessary at the moment.
- Threat Level 2: Threat to coastal marine areas due to strong currents and oscillations in sea level.
- Threat Level 3: Threat of tsunami inundation to land areas.
- Cancellation/All Clear

TEST TSUNAMI BULLETIN NUMBER 1 (TYPE-I EARTHQUAKE BULLETIN)  
IOTWMS TSUNAMI SERVICE PROVIDER AUSTRALIA (JATWC)  
ISSUED AT 0605 UTC WEDNESDAY 11 DECEMBER 2024  
-----

... EARTHQUAKE BULLETIN ...

This bulletin applies to areas within and bordering the Indian Ocean. It is issued in support of the UNESCO/IOC Indian Ocean Tsunami Warning and Mitigation System (IOTWMS).

### 1. EARTHQUAKE INFORMATION

IOTWMS-TSP AUSTRALIA has detected an earthquake with the following preliminary information:

Magnitude: 9.2 Mwp  
Depth: 10 km  
Date: 11 Dec 2024  
Origin Time: 0600 UTC  
Latitude: 3.30N  
Longitude: 95.96E  
Location: Off West Coast of Northern Sumatra

### 2. EVALUATION

Based on historical data and tsunami modelling, this earthquake may be capable of generating a tsunami affecting the Indian Ocean region. IOTWMS-TSP AUSTRALIA will monitor sea level gauges near the earthquake to determine if a tsunami was generated and will issue further bulletins for this event.

Further information on this event will be available at:  
<http://reg.bom.gov.au/tsunami/rtsp>

### 3. ADVICE

This bulletin is being issued as advice. Only national/state/local Authorities and disaster management officers have the authority to make decisions regarding the official threat and warning status in their coastal areas and any action to be taken in response.

### 4. OTHER INDIAN OCEAN TSUNAMI SERVICE PROVIDERS:

Other IOTWMS-TSPs may issue additional information at:  
IOTWMS-TSP INDIA: <https://tsunami.incois.gov.in/TEWS/TSP>  
IOTWMS-TSP INDONESIA: <http://rtsp.bmkg.go.id>

### 5. CONTACT INFORMATION

#  
#####

-----  
TEST TSUNAMI BULLETIN NUMBER 2 (TYPE-II THREAT ASSESSMENT BULLETIN)  
IOTWMS TSUNAMI SERVICE PROVIDER AUSTRALIA (JATWC)  
ISSUED AT 0615 UTC WEDNESDAY 11 DECEMBER 2024  
-----

... POTENTIAL TSUNAMI THREAT IN THE INDIAN OCEAN ...

This bulletin applies to areas within and bordering the Indian Ocean. It is issued in support of the UNESCO/IOC Indian Ocean Tsunami Warning and Mitigation System (IOTWMS).

### 1. TSUNAMI SOURCE INFORMATION

IOTWMS-TSP AUSTRALIA has detected an earthquake with the following details:

Magnitude: 9.2 Mwp  
Depth: 10 km  
Date: 11 Dec 2024  
Origin Time: 0600 UTC  
Latitude: 3.30N  
Longitude: 95.96E  
Location: Off West Coast of Northern Sumatra

### 2. EVALUATION

Events of this size are capable of generating tsunamis. However, so far there is no confirmation about the triggering of a tsunami.

An investigation is under way to determine if a tsunami has been triggered. This TSP will monitor sea level gauges and report if any tsunami wave activity has occurred.

Based on pre-run model scenarios, the zones listed below are POTENTIALLY UNDER THREAT.

### 3. TSUNAMI THREAT FOR THE INDIAN OCEAN

The list below shows the forecast arrival time of the first wave estimated to exceed 0.5m amplitude at the beach in each zone, and the amplitude of the maximum beach wave predicted for the zone. Zones where the estimated wave amplitudes are less than 0.5m at the beach are not shown.

The list is grouped by country (alphabetic order) and ordered according to the earliest estimated times of arrival at the beach.

Please be aware that actual wave arrival times may differ from those below, and the initial wave may not be the largest. A tsunami is a series of waves and the time between successive waves can be five minutes to one hour.

The threat is deemed to have passed two hours after the forecast time for last exceedance of the 0.5m threat threshold for a zone. As local conditions can cause a wide variation in tsunami wave action, CANCELLATION of national warnings and ALL CLEAR determination must be

made by national/state/local authorities.

## 4. ADVICE

This bulletin is being issued as advice. Only national/state/local authorities and disaster management officers have the authority to make decisions regarding the official threat and warning status in their coastal areas and any action to be taken in response.

5. UPDATES

Additional bulletins will be issued by IOTWMS-TSP AUSTRALIA for this event as more information becomes available.

Other IOTWMS-TSPs may issue additional information at:

TSP INDIA: <http://www.incois.gov.in/Incois/tsunami/eqevents.jsp>

TSP INDONESIA: <http://rtsp.bmkg.go.id>

-----  
TEST TSUNAMI BULLETIN NUMBER 3 (TYPE-III CONFIRMED THREAT BULLETIN)  
IOTWMS TSUNAMI SERVICE PROVIDER AUSTRALIA (JATWC)  
ISSUED AT 0630 UTC WEDNESDAY 11 DECEMBER 2024  
-----

... CONFIRMED TSUNAMI THREAT IN THE INDIAN OCEAN ...

This bulletin applies to areas within and bordering the Indian Ocean. It is issued in support of the UNESCO/IOC Indian Ocean Tsunami Warning and Mitigation System (IOTWMS).

### 1. TSUNAMI SOURCE INFORMATION

IOTWMS-TSP AUSTRALIA has detected an earthquake with the following details:

Magnitude: 9.2 Mwp  
Depth: 10 km  
Date: 11 Dec 2024  
Origin Time: 0600 UTC  
Latitude: 3.30N  
Longitude: 95.96E  
Location: Off West Coast of Northern Sumatra

### 2. EVALUATION

Sea level observations have confirmed that a TSUNAMI WAS GENERATED.  
Maximum wave amplitudes observed so far:

DART 23217	India	3.80N	91.70E	1.00m	11 Dec 05:55 UTC
Meulaboh	Indonesia	4.30N	96.22E	2.00m	11 Dec 06:00 UTC

Based on pre-run model scenarios, the zones listed below are POTENTIALLY UNDER THREAT.

### 3. TSUNAMI THREAT FOR THE INDIAN OCEAN

The list below shows the forecast arrival time of the first wave estimated to exceed 0.5m amplitude at the beach in each zone, and the amplitude of the maximum beach wave predicted for the zone. Zones where the estimated wave amplitudes are less than 0.5m at the beach are not shown.

The list is grouped by country (alphabetic order) and ordered according to the earliest estimated times of arrival at the beach.

Please be aware that actual wave arrival times may differ from those below, and the initial wave may not be the largest. A tsunami is a series of waves and the time between successive waves can be five minutes to one hour.

The threat is deemed to have passed two hours after the forecast time for last exceedance of the 0.5m threat threshold for a zone. As local conditions can cause a wide variation in tsunami wave action, CANCELLATION of national warnings and ALL CLEAR determination must be made by national/state/local authorities.

TEST TSUNAMI BULLETIN NUMBER 4 (TYPE-IV FINAL BULLETIN)  
IOTWMS TSUNAMI SERVICE PROVIDER AUSTRALIA (JATWC)  
ISSUED AT 0645 UTC WEDNESDAY 11 DECEMBER 2024  
-----

... FINAL TSUNAMI BULLETIN FOR THE INDIAN OCEAN ...

### 1. TSUNAMI SOURCE INFORMATION

IOTWMS-TSP AUSTRALIA has detected an earthquake with the following details:

Magnitude: 9.2 Mwp  
Depth: 10 km  
Date: 11 Dec 2024  
Origin Time: 0600 UTC  
Latitude: 3.30N  
Longitude: 95.96E  
Location: Off West Coast of Northern Sumatra

### 2. EVALUATION

Data from sea-level gauges confirmed that a tsunami was generated.

The expected period of significant tsunami waves is now over for all threatened Indian Ocean countries, based on IOTWMS-TSP AUSTRALIA modelling.

Because local conditions can cause a wide variation in tsunami wave action, CANCELLATION of national warnings and ALL CLEAR determination must be made by national/state/local authorities. Please be aware that dangerous currents can continue for several hours after the main tsunami waves have passed.

### 3. TSUNAMI WAVE OBSERVATIONS

Listed below are maximum wave amplitudes recorded at the specified locations. Note that wave amplitude is measured relative to normal sea level; it is NOT the crest-to-trough wave height.

DART 23217	India	3.80N	91.70E	1.00m	11 Dec 05:55 UTC
Meulaboh	Indonesia	4.30N	96.22E	2.00m	11 Dec 06:00 UTC

TSUNAMI BULLETIN NUMBER 1 (TYPE-I EARTHQUAKE BULLETIN)  
IOTWMS TSUNAMI SERVICE PROVIDER INDIA (ITEWC)  
ISSUED AT 0606 UTC WEDNESDAY 11 DECEMBER 2024  
-----

... EARTHQUAKE BULLETIN ...  
This bulletin applies to areas within and bordering the Indian Ocean. It is issued in support of the UNESCO/IOC Indian Ocean Tsunami Warning and Mitigation System (IOTWMS).

### 1. EARTHQUAKE INFORMATION

IOTWMS-TSP INDIA has detected an earthquake with the following preliminary information:

Magnitude: 9.2 M  
Depth: 10 km  
Date: 11 DEC 2024  
Origin Time: 0600UTC  
Latitude: 3.3 N  
Longitude: 95.96 E  
Location: NORTHERN SUMATRA, INDONESIA

### 2. EVALUATION

Based on historical data and tsunami modelling, this earthquake may be capable of generating a tsunami affecting the Indian Ocean region. IOTWMS-TSP INDIA will monitor sea level gauges near the earthquake to determine if a tsunami was generated and will issue further bulletins for this event. Further information on this event will be available at:

<http://www.incois.gov.in/Incois/tsunami/eqevents.jsp>

### 3. ADVICE

This bulletin is being issued as advice. Only national/state/local authorities and disaster management officers have the authority to make decisions regarding the official threat and warning status in their coastal areas and any action to be taken in response.

### 4. OTHER INDIAN OCEAN TSUNAMI SERVICE PROVIDERS:

Other IOTWMS-TSPs may issue additional information at:

IOTWMS-TSP AUSTRALIA: <http://reg.bom.gov.au/tsunami/rtsp/>

IOTWMS-TSP INDONESIA: <http://rtsp.bmkg.go.id>

TSUNAMI BULLETIN NUMBER 2 (TYPE-II THREAT ASSESSMENT BULLETIN)  
IOTWMS TSUNAMI SERVICE PROVIDER INDIA (ITEWS)  
ISSUED AT 0618 UTC Wednesday 11 December 2024  
-----

... POTENTIAL TSUNAMI THREAT IN THE INDIAN OCEAN ...  
This bulletin applies to areas within and bordering the Indian Ocean.  
It is issued in support of the UNESCO/IOC Indian Ocean Tsunami Warning and Mitigation System (IOTWMS).

### 1. EARTHQUAKE INFORMATION

IOTWMS-TSP INDIA has detected an earthquake with the following details:

Magnitude: 9.2 M  
Depth: 10 km  
Date: 11 DEC 2024  
Origin Time: 0600 UTC  
Latitude: 3.3 N  
Longitude: 95.96 E  
Location: NORTHERN SUMATRA, INDONESIA

### 2. EVALUATION

Earthquakes of this size are capable of generating tsunamis. However, so far there is no confirmation about the triggering of a tsunami. An investigation is under way to determine if a tsunami has been triggered. This TSP will monitor sea level gauges and report if any tsunami wave activity has occurred.

Based on pre-run model scenarios, the zones listed below are POTENTIALLY UNDER THREAT.

### 3. TSUNAMI THREAT FOR THE INDIAN OCEAN

The list below shows the forecast arrival time of the first wave estimated to exceed 0.5m amplitude at the beach in each zone (or a different threshold nominated by an NTWC), and the amplitude of the maximum beach wave predicted for the zone. Zones where the estimated wave amplitudes are less than the threshold amplitude at the beach are not shown.

The list is grouped by country (alphabetic order) and ordered according to the earliest estimated times of arrival at the beach.

Please be aware that actual wave arrival times may differ from those below, and the initial wave may not be the largest. A tsunami is a series of waves and the time between successive waves can be five minutes to one hour.

The threat is deemed to have passed two hours after the forecast time for last exceedance of the 0.5m threat threshold for a zone. As local conditions can cause a wide variation in tsunami wave action, CANCELLATION of national warnings and ALL CLEAR determination must be made by national/state/local authorities.

4. ADVICE

This bulletin is being issued as advice. Only national/state/local authorities and disaster management officers have the authority to make decisions regarding the official threat and warning status in their coastal areas and any action to be taken in response.

5. UPDATES

Additional bulletins will be issued by TSP INDIA for this event as more information becomes available.

Other TSPs may issue additional information at:

TSP AUSTRALIA: <http://reg.bom.gov.au/tsunami/rtsp/>

TSP INDIA: <http://www.incois.gov.in/Incois/tsunami/eqevents.jsp>

TSUNAMI BULLETIN NUMBER 3 (TYPE-III CONFIRMED THREAT BULLETIN)  
IOTWMS TSUNAMI SERVICE PROVIDER INDIA (ITEWS)  
ISSUED AT 0632 UTC Wednesday 11 December 2024  
-----

... CONFIRMED TSUNAMI THREAT IN THE INDIAN OCEAN ...  
This bulletin applies to areas within and bordering the Indian Ocean.  
It is issued in support of the UNESCO/IOC Indian Ocean Tsunami Warning and Mitigation System (IOTWMS).

### 1. EARTHQUAKE INFORMATION

IOTWMS-TSP INDIA has detected an earthquake with the following details:

Magnitude: 9.2 M  
Depth: 10 km  
Date: 11 DEC 2024  
Origin Time: 0600UTC  
Latitude: 3.3 N  
Longitude: 95.96 E  
Location: NORTHERN SUMATRA, INDONESIA

### 2. EVALUATION

Sea level observations have confirmed that a TSUNAMI WAS GENERATED.  
Maximum wave amplitudes observed so far:

Sabang (INDONESIA) 5.83 N 95.33 E 0620z 11 Dec 2024 7.5m

### 3. TSUNAMI THREAT FOR THE INDIAN OCEAN

The list below shows the forecast arrival time of the first wave estimated to exceed 0.5m amplitude at the beach in each zone (or a different threshold nominated by an NTWC), and the amplitude of the maximum beach wave predicted for the zone. Zones where the estimated wave amplitudes are less than the threshold amplitude at the beach are not shown.

The list is grouped by country (alphabetic order) and ordered according to the earliest estimated times of arrival at the beach.

Please be aware that actual wave arrival times may differ from those below, and the initial wave may not be the largest. A tsunami is a series of waves and the time between successive waves can be five minutes to one hour.

The threat is deemed to have passed two hours after the forecast time for last exceedance of the 0.5m threat threshold for a zone. As local conditions can cause a wide variation in tsunami wave action, CANCELLATION of national warnings and ALL CLEAR determination must be made by national/state/local authorities.

4. ADVICE

This bulletin is being issued as advice. Only national/state/local authorities and disaster management officers have the authority to make decisions regarding the official threat and warning status in their coastal areas and any action to be taken in response.

5. UPDATES

Additional bulletins will be issued by IOTWMS-TSP INDIA for this event as more information becomes available

TSUNAMI BULLETIN NUMBER 4 (TYPE-IV FINAL BULLETIN)  
IOTWMS TSUNAMI SERVICE PROVIDER INDIA (ITEWS)  
ISSUED AT 0644 UTC Wednesday 11 December 2024

-----  
... FINAL TSUNAMI BULLETIN ...  
This bulletin applies to areas within and bordering the Indian Ocean.  
It is issued in support of the UNESCO/IOC Indian Ocean Tsunami Warning and Mitigation System (IOTWMS).

### 1. EARTHQUAKE INFORMATION

IOTWMS-TSP INDIA has detected an earthquake with the following preliminary information:

Magnitude: 9.2 M  
Depth: 10 km  
Date: 11 DEC 2024  
Origin Time: 0600  
Latitude: 3.3 N  
Longitude: 95.96 E  
Location: NORTHERN SUMATRA, INDONESIA

### 2. EVALUATION

Data from sea-level gauges confirmed that a minor tsunami was generated. The expected period of significant tsunami waves is now over for all threatened. Because local conditions can cause a wide variation in tsunami wave action, CANCELLATION of national warnings and ALL CLEAR determination must be made by national/state/local authorities. Please be aware that dangerous currents can continue for several hours after the main tsunami waves have passed.

### 3. TSUNAMI WAVE OBSERVATIONS

Listed below are maximum wave amplitudes recorded at the specified locations. Note that wave amplitude is measured relative to normal sea level: it is NOT the crest-to-trough wave height.

Sabang (INDONESIA)	5.83 N	95.33 E	0620z	11 Dec 2024	7.5m
Meulaboh (INDONESIA)	4.13 N	96.13 E	0638z	11 Dec 2024	7.0m
Telukdalam (INDONESIA)	0.55 N	97.82 E	0642z	11 Dec 2024	5.8m

### 4. ADVICE

This bulletin is being issued as advice. Only national/state/local authorities and disaster management officers have the authority to make decisions regarding the official threat and warning status in their coastal areas and any action to be taken in response.

### 4. UPDATE

No further bulletins will be issued by IOTWMS-TSP INDIA for this event unless additional information becomes available.

### 6. OTHER INDIAN OCEAN TSUNAMI SERVICE PROVIDERS:

TSUNAMI BULLETIN NUMBER 1 (TYPE-I EARTHQUAKE BULLETIN)  
IOTWMS TSUNAMI SERVICE PROVIDER INDONESIA (InaTEWS-BMKG)  
issued at 0605 UTC, Dec 11, 2024  
-----

... EARTHQUAKE BULLETIN ...

This bulletin applies to areas within and bordering the Indian Ocean. It is issued in support of the UNESCO/IOC Indian Ocean Tsunami Warning and Mitigation System (IOTWMS).

#### 1. EARTHQUAKE INFORMATION

IOTWMS-TSP INDONESIA has detected an earthquake with the following preliminary information:

Magnitude : 9.2 Mwp  
Depth : 10km  
Date : 11 Dec 2024  
Origin Time: 06:00:00 UTC  
Latitude : 3.30N  
Longitude : 95.96E  
Location : Off West Coast of Northern Sumatra

#### 2. EVALUATION

Based on historical data and tsunami modelling, this earthquake may be capable of generating a tsunami affecting the Indian Ocean region. IOTWMS-TSP INDONESIA will monitor sea level gauges near the earthquake to determine if a tsunami was generated and will issue further bulletins for this event.

Further information on this event will be available at:  
<http://rtsp.bmkg.go.id>

#### 3. ADVICE

This bulletin is being issued as advice. Only national/state/local authorities and disaster management officers have the authority to make decisions regarding the official threat and warning status in their coastal areas and any action to be taken in response.

#### 4. OTHER INDIAN OCEAN TSUNAMI SERVICE PROVIDERS:

TSUNAMI BULLETIN NUMBER 2 (TYPE-II THREAT ASSESSMENT BULLETIN)  
IOTWMS TSUNAMI SERVICE PROVIDER INDONESIA (InaTEWS-BMKG)  
issued at 0615 UTC, Dec 11, 2024  
-----

... POTENTIAL TSUNAMI THREAT IN THE INDIAN OCEAN ...

This bulletin applies to areas within and bordering the Indian Ocean. It is issued in support of the UNESCO/IOC Indian Ocean Tsunami Warning and Mitigation System (IOTWMS).

#### 1. EARTHQUAKE INFORMATION (updated)

IOTWMS-TSP INDONESIA has detected an earthquake with the following details:

Magnitude : 9.2 Mwp (REVISED)  
Depth : 10km  
Date : 11 Dec 2024  
Origin Time: 06:00:00 UTC  
Latitude : 3.30N  
Longitude : 95.96E  
Location : Off West Coast of Northern Sumatra

#### 2. EVALUATION

Earthquakes of this size are capable of generating tsunamis. However, so far there is no confirmation about the triggering of a tsunami.

An investigation is under way to determine if a tsunami has been triggered. This TSP will monitor sea level gauges and report if any tsunami wave activity has occurred.

Based on pre-run model scenarios, the zones listed below are POTENTIALLY UNDER THREAT.

#### 3. TSUNAMI THREAT FOR THE INDIAN OCEAN

The list below shows the forecast arrival time of the first wave estimated to exceed 0.5m amplitude at the beach in each zone (or a different threshold nominated by an NTWC), and the amplitude of the maximum beach wave predicted for the zone. Zones where the estimated wave amplitudes are less than the threshold amplitude at the beach are not shown.

The list is grouped by country (alphabetic order) and ordered according to the earliest estimated times of arrival at the beach.

Please be aware that actual wave arrival times may differ from those below, and the initial wave may not be the largest. A tsunami is a series of waves and the time between successive waves can be five minutes to one hour.

The threat is deemed to have passed two hours after the forecast time for last exceedance of the 0.5m threat threshold for a zone. As local conditions can cause a wide variation in tsunami wave action, CANCELLATION of national warnings and ALL CLEAR determination must be made by national/state/local authorities.

4. ADVICE

This bulletin is being issued as advice. Only national/state/local authorities and disaster management officers have the authority to make decisions regarding the official threat and warning status in their coastal areas and any action to be taken in response.

5. UPDATES

Additional bulletins will be issued by IOTWMS-TSP INDONESIA for this event as more information becomes available.

Other TSPs may issue additional information at:

IOTWMS-TSP AUSTRALIA: <http://reg.bom.gov.au/tsunami/rtsp/>

IOTWMS-TSP INDIA: <http://www.incois.gov.in/Incois/tsunami/eqevents.jsp>

TSUNAMI BULLETIN NUMBER 3 (TYPE-III CONFIRMED THREAT BULLETIN)  
IOTWMS TSUNAMI SERVICE PROVIDER INDONESIA (InaTEWS-BMKG)  
issued at 0630 UTC, Dec 11, 2024  
-----

... CONFIRMED TSUNAMI THREAT IN THE INDIAN OCEAN ...

This bulletin applies to areas within and bordering the Indian Ocean. It is issued in support of the UNESCO/IOC Indian Ocean Tsunami Warning and Mitigation System (IOTWMS).

### 1. EARTHQUAKE INFORMATION (updated)

IOTWMS-TSP INDONESIA has detected an earthquake with the following details:

Magnitude : 9.2 Mwp (REVISED)  
Depth : 10km  
Date : 11 Dec 2024  
Origin Time: 06:00:00 UTC  
Latitude : 3.30N  
Longitude : 95.96E  
Location : Off West Coast of Northern Sumatra

### 2. EVALUATION

Sea level observations have confirmed that a TSUNAMI WAS GENERATED.  
Maximum wave amplitudes observed so far:

LOCATION	COUNTRIES	LAT	LON	AMPL(m)	TIME(UTC)	DATE
TELUKDALAM	INDONESIA	00.55N	97.82E	18.7	06:00	Dec 06, 2024
SABANG	INDONESIA	05.83N	95.33E	06.1	06:18	Dec 06, 2024

Based on pre-run model scenarios, the zones listed below are POTENTIALLY UNDER THREAT.

### 3. TSUNAMI THREAT FOR THE INDIAN OCEAN

The list below shows the forecast arrival time of the first wave estimated to exceed 0.5m amplitude at the beach in each zone (or a different threshold nominated by an NTWC), and the amplitude of the maximum beach wave predicted for the zone. Zones where the estimated wave amplitudes are less than the threshold amplitude at the beach are not shown.

The list is grouped by country (alphabetic order) and ordered according to the earliest estimated times of arrival at the beach.

Please be aware that actual wave arrival times may differ from those below, and the initial wave may not be the largest. A tsunami is a series of waves and the time between successive waves can be five minutes to one hour.

The threat is deemed to have passed two hours after the forecast time for last exceedance of the 0.5m threat threshold for a zone. As local conditions can cause a wide variation in tsunami wave action, CANCELLATION of national warnings and ALL CLEAR determination must be made by national/state/local authorities.

TSUNAMI BULLETIN NUMBER 4 (TYPE-IV FINAL BULLETIN)  
IOTWMS TSUNAMI SERVICE PROVIDER INDONESIA (InaTEWS-BMKG)  
issued at 0645 UTC, Dec 11, 2024  
-----

... FINAL TSUNAMI BULLETIN FOR THE INDIAN OCEAN ...

This bulletin applies to areas within and bordering the Indian Ocean. It is issued in support of the UNESCO/IOC Indian Ocean Tsunami Warning and Mitigation System (IOTWMS).

### 1. EARTHQUAKE INFORMATION

IOTWMS-TSP INDONESIA detected an earthquake with the following details:

Magnitude : 9.2 Mwp (REVISED)  
Depth : 10km  
Date : 11 Dec 2024  
Origin Time: 06:00:00 UTC  
Latitude : 3.30N  
Longitude : 95.96E  
Location : Off West Coast of Northern Sumatra

### 2. EVALUATION

Data from sea-level gauges confirmed that a tsunami was generated.

The expected period of significant tsunami waves is now over for all threatened Indian Ocean countries, based on IOTWMS-TSP INDONESIA modelling.

Because local conditions can cause a wide variation in tsunami wave action, CANCELLATION of national warnings and ALL CLEAR determination must be made by national/state/local authorities. Please be aware that dangerous currents can continue for several hours after the main tsunami waves have passed.

### 3. TSUNAMI WAVE OBSERVATIONS

Listed below are maximum wave amplitudes recorded at the specified locations. Note that wave amplitude is measured relative to normal sea level; it is NOT the crest-to-trough wave height.

LOCATION	COUNTRIES	LAT	LON	AMPL(m)	TIME(UTC)	DATE
TELUKDALAM	INDONESIA	00.55N	97.82E	18.7	06:00	Dec 06, 2024
SABANG	INDONESIA	05.83N	95.33E	06.1	06:18	Dec 06, 2024

### 4. ADVICE

This bulletin is being issued as advice. Only national/state/local authorities and disaster management officers have the authority to make decisions regarding the official threat and warning status in their coastal areas and any action to be taken in response.

### 5. UPDATES

No further bulletins will be issued by IOTWMS-TSP INDONESIA for this event unless additional information becomes available.
